

Candidate R014

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Data Engineer | Veterans United Nonprofit | 2023-01 to Present

Lead design and maintenance of ETL pipelines for donor analytics, improving data freshness by 40% through Kafka streaming integration and query tuning. Spearheaded migration to dbt, reducing pipeline development time by 25%.

Data Engineer | Logistics Group Inc. | 2021-06 to 2022-12

Developed real-time shipment tracking pipelines using Kafka, handling 2M events daily. Optimized MySQL queries reducing reporting latency by 30%.

ETL Developer | HealthFirst Solutions | 2020-01 to 2021-05

Built ETL processes for claims data cleansing and integration, reducing duplicate records by 15%. Implemented API integrations with third-party providers.

Data Analyst | Market Trends Co. | 2018-08 to 2019-12

Performed data cleansing and query tuning for customer segmentation, improving campaign ROI by 20%. Assisted in migrating legacy SQL scripts to Python.

Data Technician | IT Support Services | 2017-01 to 2018-07

Managed and cleaned data for client reports, reducing error rates by 10%. Automated routine data extraction using Python.

Signal Intelligence Analyst | Air National Guard | 2014-01 to 2016-12

Processed and analyzed time-sensitive signal data, ensuring 100% accuracy in reporting. Developed protocols for data integration that reduced analysis time by 25%.

Junior Data Analyst | Small Business Consulting | 2013-01 to 2013-12

Assisted in data collection and reporting, improving data accuracy by 15% through regular cleansing.

SKILLS

Query tuning; Streaming data processing; ETL pipeline development; API integration; Data integration; Performance tuning; Data cleansing; Python; Apache Kafka; Scala; MySQL; dbt

EDUCATION

Associate of Applied Science | Computer Network Systems | ITT Technical Institute

2012-09 to 2014-06

PROJECTS

Real-time Data Pipeline for Donor Analytics

Built a streaming pipeline using Kafka and Python to process donation events in near real-time, improving data freshness by 40%. Technologies used: Apache Kafka, dbt, MySQL.

Data Cleansing Automation

Developed Python scripts to automate data cleansing for legacy systems, reducing manual effort by 60% and errors by 25%. Technologies used: MySQL.

CERTIFICATIONS

AWS Certified Big Data – Specialty

Issued by Amazon Web Services.

2021-01

Google Professional Data Engineer

Issued by Google.

2022-01
