

Candidate R021

Synthetic candidate profile

EMPLOYMENT HISTORY

Communications Systems Specialist (Mobile App Developer) | United States Space Force | 2017-06 to 2021-03

Developed and maintained internal logistics tracking applications for satellite communications, focusing on real-time data synchronization and offline capabilities. Collaborated with cross-functional teams to implement secure mobile solutions.

Senior React Native Developer (Contract) | Fusion Logistics Solutions | 2021-04 to 2023-08

Led the development of a cross-platform mobile app for fleet management, integrating push notifications, crash reporting, and deep linking to enhance driver efficiency. Mentored junior developers and enforced code quality standards.

Lead React Native Developer (Staffing) | Spartan Tech Staffing | 2023-09 to Present

Currently leading a mobile development team for a logistics client, architecting secure offline-first solutions and coordinating with product managers to deliver high-impact features. Managing a team of four developers and ensuring alignment with security best practices.

SKILLS

Deep linking; Native Modules; React Navigation; Push notifications; Crashlytics; TypeScript; Offline storage; Redux; Jest; Git; REST APIs

EDUCATION

Certificate | Full Stack Web Development | Lambda School (now Bloom Institute of Technology)

2015-09 to 2016-06

Associate of Applied Science | Communications Technology | Community College of the Air Force

2012-09 to 2014-06

PROJECTS

Offline-First Logistics Tracker

Developed a React Native app for tracking military cargo with full offline storage using SQLite and sync protocols, handling unreliable network conditions in remote locations. Technologies used: Redux, Native Modules.

CERTIFICATIONS

Meta React Native Certification

Issued by Meta.
