

Candidate R025

Synthetic candidate profile

EMPLOYMENT HISTORY

Data Analyst | Hawkeye Manufacturing Solutions | 2023-06 to Present

Leveraged advanced analytics to drive process optimization, utilizing Power BI for reporting and Python for data preprocessing. Collaborated cross-functionally to streamline inventory management, realizing a 15% reduction in waste.

Production Associate | Hawkeye Manufacturing Solutions | 2022-01 to 2023-05

Executed daily production tasks while actively participating in continuous improvement initiatives. Demonstrated commitment to quality and efficiency, earning recognition for proactive problem-solving.

SKILLS

Reinforcement Learning; LightGBM; Time Series Analysis; Data Preprocessing; Deep Learning; XGBoost; Power BI; Pandas; Docker; Kubeflow; NumPy; Python; SQL

EDUCATION

Certificate | Data Analytics | Kirkwood Community College

2022-09 to 2023-06

PROJECTS

Predictive Maintenance Model

Developed a time series model using XGBoost and LightGBM to forecast equipment failures, improving maintenance scheduling and reducing downtime by 20%. Technologies used: Pandas, NumPy.

Reinforcement Learning for Inventory Optimization

Implemented a reinforcement learning agent to optimize inventory levels in a simulated manufacturing environment, demonstrating potential for cost savings. Technologies used: Python.

CERTIFICATIONS

TensorFlow Developer Certificate

Issued by TensorFlow.

2023-01
