

Candidate R041

Synthetic candidate profile

EMPLOYMENT HISTORY

Lead Data Engineer | Solano County Credit Union | 2018-07 to 2023-12

Managed a team of five engineers building streaming ETL pipelines for real-time fraud detection and customer analytics. Declined further management to return to hands-on engineering, paving the way for a senior IC role.

Senior Big Data Engineer | CommonWealth Central Credit Union | 2013-03 to 2018-06

Architected a cloud-based data lake on Amazon S3 using Apache Hudi, and migrated batch processing to streaming with Flink. Worked closely with data science to improve model features.

Big Data Engineer | Golden 1 Credit Union | 2008-01 to 2013-02

Developed large-scale MapReduce jobs and optimized data warehouse loads. Introduced Airflow for scheduling, cutting pipeline failures by 40%.

Data Analyst | Travis Credit Union | 2002-06 to 2007-12

Performed SQL-based analysis and reporting for lending operations, gaining deep credit union domain knowledge. Moved toward engineering after automating report generation with Python scripts.

IT Support Specialist | Napa Valley Bank | 2000-01 to 2002-05

Provided desktop support and basic network troubleshooting while studying for a degree in computer science.

SKILLS

Apache Hudi; ETL pipelines; Apache Airflow; Data lake architecture; Snowflake; NoSQL databases; Distributed computing; MapReduce; Apache Cassandra; Apache Flink; Google BigQuery; Stream processing; Apache Spark; Python; Amazon S3; Kafka; Kubernetes; Terraform

EDUCATION

Bachelor of Science | Computer Science | California State University, Sacramento

1999-09 to 2004-06

PROJECTS

Real-Time Fraud Detection Pipeline

Engineered a streaming solution using Flink and Kafka to flag fraudulent transactions within milliseconds, processing millions of events daily. Technologies used: Apache Flink, Apache Kafka, Cassandra.

Data Lake Migration to Hudi

Led migration of legacy Hive tables to an Apache Hudi-based lake on S3, enabling upserts and time-travel queries, reducing storage costs by 30%. Technologies used: Amazon S3, Apache Spark.

CERTIFICATIONS

Google Professional Data Engineer

Issued by Google.

2021-01
