

Candidate E004

Synthetic candidate profile

EMPLOYMENT HISTORY

Junior Machine Learning Engineer | Energy Dynamics Cooperative | 2022-06 to Present

Spearheaded the development of a speech-to-text system for field technicians, leveraging cutting-edge ML techniques to transcribe noisy audio from power plant environments, resulting in a 30% reduction in documentation time.

Data Analyst | Peak Energy Services | 2021-08 to 2022-05

Leveraged SQL and Tableau to deliver actionable insights on energy consumption patterns, enabling the sales team to target high-value accounts with precision.

Technical Support Specialist | Comcast | 2019-01 to 2021-07

Provided tier-2 support for VoIP services, troubleshooting complex network issues and escalating critical incidents; self-taught Python and machine learning during nights and weekends.

SKILLS

Python; Feature Engineering; scikit-learn; MLOps; SQL; Hadoop; Spark; AWS; dbt; Apache Kafka; Tableau; Hyperparameter Tuning; Data Visualization

EDUCATION

Associate of Science | Computer Science | Community College of Denver

2017-09 to 2019-06

Data Science | University of Colorado Denver

2023-09 to date unavailable

PROJECTS

Real-time Noise-robust Speech Recognition

Developed an end-to-end speech recognition pipeline using convolutional neural networks and attention mechanisms, optimized for industrial noise, deployed on AWS Lambda with Apache Kafka for streaming. Technologies used: Python, TensorFlow.

Predictive Maintenance for Energy Grid

Built a Spark-based predictive model to forecast equipment failures using sensor data, achieving 92% accuracy and integrating with dbt for reliable data transformations. Technologies used: Hadoop, MLOps.

CERTIFICATIONS

AWS Certified Machine Learning – Specialty

Issued by Amazon Web Services.

2023-01

TensorFlow Developer Certificate

Issued by Google.

2022-01
