

Candidate E015

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Python Developer | National Cyber Defense Foundation | 2023-03 to Present

Spearheading the development of resilient Python-based systems for national defense initiatives, leveraging asynchronous programming to enhance performance and reliability. Orchestrating CI/CD pipelines with GitLab to streamline deployment processes.

Python Developer / Site Reliability Engineer | TechBridge Solutions | 2021-10 to 2023-02

Architected and implemented robust Python microservices, utilizing Redis for caching and optimizing performance under high load. Provided code review and mentoring to junior developers, fostering a culture of excellence.

DevOps Engineer | DataStream Networks | 2020-05 to 2021-08

Rebuilt the CI/CD pipeline with GitLab and Docker, improving deployment frequency by 40%. Automated infrastructure provisioning with Terraform, ensuring scalability and cost efficiency.

Python Developer | Apex Consulting Group | 2019-01 to 2020-03

Developed and maintained custom Python applications for diverse clients, emphasizing code quality and performance optimization. Introduced type hints to improve maintainability.

IT Specialist | Florida Air National Guard | 2017-02 to 2018-12

Managed communication systems and supported cybersecurity initiatives, holding a Top Secret clearance. Collaborated with cross-functional teams to ensure mission-critical operations.

Network Administrator | SecureComm | 2015-08 to 2017-01

Administered and optimized enterprise network infrastructure, ensuring high availability and performance. Implemented automation scripts in Python to streamline operations.

Systems Analyst | HealthFirst Systems | 2014-03 to 2015-06

Analyzed system requirements and implemented automated data processing solutions using Python. Collaborated with stakeholders to improve system efficiency.

Junior Python Developer | CloudAxis Technologies | 2012-09 to 2014-01

Contributed to the development of cloud-based applications, focusing on Python and asynchronous programming. Participated in code reviews and testing.

SKILLS

Python; Asynchronous programming; Performance optimization; CI/CD pipelines; Docker; GitLab; Git; Redis; Type hints; Code review; Pip; Bitbucket; Kubernetes; Terraform

EDUCATION

Certificate | Information Technology | Union Apprenticeship Program

2010-09 to 2012-06

Associate of Science | Computer Science | Brevard Community College

2006-09 to 2009-06

PROJECTS

Resilient Messaging System

Designed a distributed messaging platform using Python and Redis, achieving 99.9% uptime and supporting high-throughput asynchronous communication. Technologies used: Asynchronous programming, Docker.

Mission-Critical Deployment Pipeline

Created a CI/CD pipeline with GitLab and Docker for a government client, reducing deployment time by 50% and ensuring compliance with security protocols. Technologies used: CI/CD pipelines, Python.

CERTIFICATIONS

PCPP – Certified Professional in Python Programming

Issued by Python Institute.

2021-01

AWS Certified Developer – Associate

Issued by Amazon Web Services.

2022-01
