

Candidate E023

Synthetic candidate profile

EMPLOYMENT HISTORY

Junior DevOps Engineer | Omni Retail Solutions | 2019-03 to 2021-01

Assisted in maintaining CI/CD pipelines and monitoring systems for a national retail chain's e-commerce platform. Performed routine backups and basic Linux administration.

DevOps Engineer | Omni Retail Solutions | 2021-02 to 2023-06

Managed release processes for multiple applications, implemented service mesh for microservices, and optimized cloud costs. Introduced automated rollback strategies reducing downtime.

Senior DevOps Engineer | Omni Retail Solutions | 2023-07 to Present

Currently leading release engineering for a national retail chain's cloud infrastructure. Focus on service mesh implementation, cost optimization, and mentoring junior engineers.

SKILLS

Release management and rollback strategies; Service mesh implementation; Infrastructure as Code (IaC); Linux system administration; Backup and restore procedures; Cost optimization; Docker; AWS; ELK Stack; Grafana; Jenkins; Python; Bash; Terraform; Kubernetes

EDUCATION

Certificate | DevOps Engineering | Tech Bootcamp

2018-09 to 2019-06

Bachelor of Science | Computer Science | University of Dhaka

2012-09 to 2016-06

PROJECTS

Automated Rollback System

Designed and implemented an automated rollback mechanism for critical applications, reducing recovery time from hours to minutes and ensuring high availability. Technologies used: Jenkins, AWS, Docker.

Service Mesh Adoption

Led the implementation of a service mesh across a microservices architecture, improving observability and traffic management. Technologies used: Istio, Kubernetes, Grafana.

CERTIFICATIONS

AWS Certified DevOps Engineer – Professional

Issued by Amazon Web Services.

2023-01
