

Candidate E024

Synthetic candidate profile

EMPLOYMENT HISTORY

Data Engineer | Minnesota Department of Revenue | 2021-03 to Present

Design and maintain ELT pipelines for tax data. Implement data lake architecture and streaming ingestion using Kafka and Dataflow. Ensure data governance and lineage for compliance.

Junior Data Engineer | Minnesota Department of Revenue | 2019-06 to 2021-02

Built and maintained ETL jobs using Talend and AWS Glue. Cleansed and partitioned large datasets for analytics.

Data Analyst | Minnesota Department of Revenue | 2018-01 to 2019-05

Analyzed tax data and created reports. Led migration of on-premise data to cloud using Snowflake and AWS.

Systems Analyst | IT Solutions Brazil | 2015-01 to 2017-12

Supported data systems and performed data ingestion and cleansing for clients. Worked with early versions of Talend.

SKILLS

Data cleansing; Workflow scheduling; Data ingestion; Streaming data processing; Data lake architecture; Scala/Spark development; Data governance; Real-time data processing; ELT pipeline development; Data partitioning; Data lineage; Data partitioning strategies; Python; Google Cloud Dataflow; Talend; SQL; CloudFormation; Terraform; Airflow

EDUCATION

Certificate | Data Engineering | Bootcamp Data Engineering

2017-09 to 2018-06

Bachelor's | Computer Science | University of São Paulo

2010-09 to 2014-06

PROJECTS

Real-Time Tax Filing Monitoring

Built streaming pipeline to monitor tax filings in real time using Kafka and Dataflow. Technologies used: Apache Kafka, Google Cloud Dataflow, Python.

CERTIFICATIONS

Google Professional Data Engineer

Issued by Google.

2022-01
