

Candidate E034

Synthetic candidate profile

EMPLOYMENT HISTORY

Lead Frontend Engineer | TechVista Media Group | 2021-03 to Present

Leading frontend platform for streaming services. Implemented design system using TypeScript and Tailwind CSS, improving cross-browser compatibility. Mentor junior engineers and own architecture decisions for multiple web applications.

Senior Frontend Engineer | DataSys Federal Solutions | 2018-08 to 2021-02

Developed secure frontend applications for federal clients. Utilized Next.js and SSR for performance. Ensured compliance with WCAG 2.1 and improved Core Web Vitals. Worked with legacy systems and modernized UI.

Frontend Engineer | Clarity Embedded Systems | 2015-02 to 2018-06

Built real-time dashboard for mission control. Used Svelte and WebSockets for live updates. Managed testing strategy with Jest and Cypress. Reduced bundle size by 40% via code splitting.

Web Developer | Synergy Interactive | 2013-03 to 2015-01

Developed interactive web experiences for clients. Built accessible HTML5/CSS3 layouts ensuring cross-browser compatibility. Implemented PWA features to enhance offline capabilities.

Combat Systems Technician | US Navy | 2006-06 to 2013-02

Maintained radar systems and navigation equipment. Developed technical documentation. Transitioned to web development after completing certifications.

SKILLS

TypeScript; Next.js; Tailwind CSS; Svelte; Cross-Browser Compatibility; WebSockets; Progressive Web Apps (PWA); HTML5; Core Web Vitals; Server-Side Rendering (SSR); Testing (Jest, React Testing Library, Cypress); npm; Vite; ESLint

EDUCATION

BS in Computer Information Systems | Information Technology | DeVry University

2013-09 to 2016-06

PROJECTS

Design System Library

Developed a scalable design system using TypeScript and Tailwind CSS, enabling consistent UI across multiple streaming platforms. Included storybook documentation and automated testing.

Real-Time Collaboration Tool

Built a real-time collaboration tool using Svelte and WebSockets for secure communication between remote teams. Ensured cross-browser compatibility and performance. Technologies used: Cypress.
