

Candidate E042

Synthetic candidate profile

EMPLOYMENT HISTORY

Junior Backend Developer | University of Houston | 2022-06 to Present

Develop and maintain backend services for the university's financial aid portal, handling student data and award disbursements. Implemented WebSocket notifications for real-time updates and redesigned the database schema to support new federal reporting requirements.

Full Stack Developer Intern | Texas Southern University | 2021-08 to 2022-05

Built RESTful APIs and integrated authentication for the university's alumni portal. Worked with TypeScript and PostgreSQL to provide secure data access for alumni records.

IT Support Technician | Houston Community College | 2020-01 to 2021-08

Provided technical support for faculty and students, troubleshooting network and hardware issues. Assisted with system migrations and maintained documentation for IT procedures.

SKILLS

Java; PostgreSQL; TypeScript; WebSocket; Distributed transactions; Containerization; Authentication and authorization; Database design; Data serialization; Serverless computing

EDUCATION

Certificate | Full Stack Web Development | Houston Community College

2019-09 to 2021-06

PROJECTS

University Event Ticketing Platform

Developed a serverless microservice for event ticket sales using AWS Lambda and EventBridge, handling hundreds of concurrent WebSocket connections during peak sales. Technologies used: Java, TypeScript, PostgreSQL.

Student Grade Notification System

Built a system that sends real-time grade updates to students via WebSocket, using distributed transactions to ensure consistency across multiple services. Technologies used: Java.

CERTIFICATIONS

AWS Certified Solutions Architect

Issued by Amazon Web Services.
