

Candidate E044

Synthetic candidate profile

EMPLOYMENT HISTORY

Contract Backend Engineer | University of Washington | 2024-01 to Present

Designing and implementing distributed backend services for research data management, focusing on reliability and scalability.

Senior Backend Engineer (Contract) | Northwest Financial Systems | 2022-03 to 2023-12

Built high-throughput transaction processing systems using Go and Kafka, ensuring backward compatibility and robust error handling.

Backend Engineer (Contract) | Seattle Payment Solutions | 2020-08 to 2022-02

Developed payment processing APIs with Node.js and TypeScript, implementing rate limiting and caching strategies.

Backend Engineer (Contract) | DataWorks Analytics | 2019-05 to 2020-07

Implemented message queue systems with RabbitMQ and integrated WebSocket connections for real-time data streaming.

Junior Backend Engineer (Contract) | Pacific Tech Solutions | 2018-01 to 2019-04

Supported backend services, writing unit tests and debugging issues.

Software Engineer (Contract) | Freelance | 2016-10 to 2017-12

Various short-term projects for local businesses, including a small inventory system and a booking tool.

Technical Support Specialist | Evergreen College | 2015-06 to 2016-09

Provided IT support and maintained student database systems.

SKILLS

Go; TypeScript; Node.js; Java; gRPC; WebSocket; Message queues; Kafka; RabbitMQ; Caching strategies; Rate limiting; Logging; Observability; Integration testing; Unit testing; Backward compatibility; Authentication and authorization; Temporal

EDUCATION

Bachelor of Arts | Computer Science | Whitman College

2011-09 to 2015-06

PROJECTS

Real-time Notification Service

Built a real-time notification system using WebSocket and Kafka, handling millions of events per day. Technologies used: Go.

Payment API Rate Limiting

Designed a rate limiting layer for a payment API using Redis and Go, reducing abuse and ensuring fair usage.

CERTIFICATIONS

AWS Certified Solutions Architect

Issued by Amazon Web Services.

2021-01

Certified Kubernetes Application Developer (CKAD)

Issued by Cloud Native Computing Foundation.

2019-01
