

Candidate P001

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior DevOps Engineer | Gulf Coast Financial Services | 2015-03 to Present

Hybrid 2-3 days. Lead cloud infra on Azure, IaC with Ansible, CI/CD via GitLab CI/Jenkins. Measure service health with New Relic, run chaos drills, cut release rollback time by 40%. Mentor two engineers, still hands-on.

DevOps Engineer | Tampa Bay Credit Union | 2010-06 to 2015-02

Migrated on-prem apps to Azure, built CI/CD, config with Ansible. Improved observability with New Relic. Part of incident response, disaster recovery drills.

Systems Administrator | Suncoast Insurance Group | 2005-08 to 2010-05

Lateral move from IT support. Managed Windows/Linux servers, network config, backups. Hand-rolled deployment scripts. Started automating with Ansible.

IT Support Technician | Family-owned Bay Area Realty | 2003-01 to 2005-07

First job. Desktop support, basic networking, learned scripting on the side.

SKILLS

Cloud platform management; Infrastructure as Code (IaC); Configuration management; Release management and rollback strategies; Observability and distributed tracing; Disaster recovery planning; Security hardening and compliance; Chaos engineering; Performance tuning; Network configuration and troubleshooting; Infrastructure testing; Build automation; Ansible; Azure; Docker; GitLab CI; Jenkins; New Relic

EDUCATION

Bachelor of Science | Computer Science | Florida A&M University

1998-09 to 2002-06

PROJECTS

Disaster Recovery Automation

Built automated failover for critical banking apps using Azure Site Recovery and Ansible playbooks. Reduced RTO from hours to minutes. Technologies used: PowerShell.

Observability Pipeline

Centralized logging and metrics with New Relic, added distributed tracing to microservices. Enabled quick root cause analysis in prod. Technologies used: Docker, Kubernetes.
