

Candidate P004

Synthetic candidate profile

EMPLOYMENT HISTORY

Case Manager | Nebraska Family Services | 2012-01 to 2020-06

Managed a caseload of 30+ at-risk youth, coordinating with CPS, courts, and schools.

Documented every case in CRM, tracked outcomes, and shifted to evening/night shifts to cover crisis calls.

Program Coordinator | Lincoln Community Action Partnership | 2020-07 to 2024-01

Oversaw after-school programs, managed grants and reporting, and trained staff. Built Excel dashboards and moved to rotating shifts to cover program hours.

Data Engineering Bootcamp Student | StreamSet Academy | 2024-02 to 2024-08

Completed 6-month intensive bootcamp on streaming data: built Flink pipelines, used Kafka, and learned real-time monitoring with Grafana.

Freelance Data Engineer (Contract) | Self | 2024-09 to Present

Building a log aggregation pipeline for a local startup using Flink and Kafka, with Iceberg for storage and Grafana for dashboards.

SKILLS

Apache Flink; Monitoring and alerting for streaming; Stateful stream processing; Streaming ETL; Schema management; Apache Spark Streaming; Streaming data quality; Event-driven architecture; Apache Spark; Apache Iceberg; Grafana; Materialize; Apache Hudi; SQL; Python; Kafka

EDUCATION

BSW | Social Work | University of Nebraska Omaha

2007-09 to 2011-06

Data Engineering | StreamSet Academy

2024-09 to 2024-06

PROJECTS

Log Aggregation Pipeline

Real-time log pipeline ingesting from microservices, using Flink for stateful processing, Kafka for transport, and Iceberg for storage. Grafana dashboards monitor latency and errors. Technologies used: Apache Flink, Apache Kafka, Apache Iceberg.

Customer Event Stream

Event-driven architecture for clickstream data, using Spark Streaming for ETL and Hudi for upserts. Implemented schema management and data quality checks. Technologies used: Apache Spark, Apache Hudi, Apache Spark Streaming.

CERTIFICATIONS

Cloudera CCA Spark and Hadoop Developer

Issued by Cloudera.
