

Candidate P011

Synthetic candidate profile

EMPLOYMENT HISTORY

Big Data Engineer | Red River Manufacturing Corp. | 2018-03 to Present

Design and maintain data lake architecture for IoT sensor data and production metrics. Implement ETL pipelines using Apache NiFi and Airflow, optimize Spark jobs, and manage HDFS and Cassandra clusters.

Data Engineer | Red River Manufacturing Corp. | 2015-01 to 2018-02

Developed data warehousing solutions and batch processing pipelines. Migrated on-prem Hadoop workloads to cloud-based Delta Lake, cutting processing time by 30%.

BI Analyst | Red River Manufacturing Corp. | 2011-06 to 2014-12

Analyzed production data and created dashboards in Tableau. Gained deep domain knowledge of manufacturing KPIs, OEE and downtime analysis.

SKILLS

Apache Spark; Apache Airflow; Data lake architecture; Data warehousing; Delta Lake; Apache Hudi; HDFS; Apache Cassandra; Snowflake; Cluster management; Apache NiFi; Apache Hadoop; Apache Flink; Python; SQL

EDUCATION

PhD | Computer Science | Louisiana State University

2005-09 to 2011-06

PROJECTS

Real-Time Production Monitoring

Built a streaming pipeline using Flink and NiFi to ingest sensor data into Cassandra, enabling real-time machine health alerts. Technologies used: Apache Flink, Apache NiFi, Apache Cassandra.

Data Lake Optimization

Refactored data lake storage using Hudi and Delta Lake, reducing storage costs by 25% and improving query performance by 40%. Technologies used: Apache Hudi, Apache Spark.

CERTIFICATIONS

Cloudera Certified Professional (CCP) Data Engineer

Issued by Cloudera.

2019-01

DataBricks Certified Associate Developer for Apache Spark

Issued by DataBricks.

2021-01
