

# Candidate P012

Synthetic candidate profile

## EMPLOYMENT HISTORY

Machine Learning Engineer | MediCore Manufacturing Solutions | 2022-06 to Present

Leading the development of a predictive maintenance system that uses sensor data and natural language processing of maintenance logs to reduce downtime by 20%. Building and deploying models on AWS with MLOps practices.

Data Analyst | ChemCore Plastics | 2020-01 to 2022-05

Analyzed production data to identify quality issues and created dashboards in Tableau. I also started experimenting with machine learning models on my own, which eventually led me to a role focused on ML.

Production Associate | ChemCore Plastics | 2018-08 to 2019-12

Worked on the plant floor, operating machinery and conducting quality checks. This role gave me a deep understanding of the manufacturing process and the kinds of data we generate, which became valuable when I transitioned to data roles.

## SKILLS

scikit-learn; TensorFlow; PyTorch; XGBoost; LightGBM; Recommender Systems; Model Evaluation; Model Selection; Hadoop; Big Data Technologies; Pandas; Airflow; PostgreSQL; MLflow; Tableau; AWS; Kubernetes

## EDUCATION

Associate of Science | Computer Science | Northern Virginia Community College

2018-09 to 2020-06

## PROJECTS

Predictive Maintenance for Injection Molding

Developed an end-to-end pipeline using sensor data and NLP on maintenance logs to predict equipment failures. Utilized XGBoost and LightGBM with model evaluation and selection tools, and deployed on AWS with Airflow for scheduling. Technologies used: Python, Pandas, scikit-learn.

Recommendation Engine for Medical Research Papers

Built a recommender system for clinicians using collaborative filtering and content-based methods with PyTorch and TensorFlow. Integrated with a PostgreSQL database and containerized with Kubernetes for scalable serving. Technologies used: Python, Recommendation Systems.

## CERTIFICATIONS

TensorFlow Developer Certificate

Issued by TensorFlow.

2022-01

AWS Certified Machine Learning – Specialty

Issued by Amazon Web Services.

2023-01
