

Candidate P033

Synthetic candidate profile

EMPLOYMENT HISTORY

DevOps Team Lead | Sentinel Logistics Solutions | 2016-03 to 2019-11

Led a team of three in managing Kubernetes clusters and CI/CD pipelines for logistics tracking systems. Implemented service mesh to improve microservices communication and reduce latency.

Senior DevOps Engineer | Atlantic Freight Systems | 2013-05 to 2016-02

Designed and implemented immutable infrastructure for containerized applications. Automated build and deployment processes, reducing release times by 40%.

DevOps Engineer | Harbor IT Services | 2011-06 to 2013-04

Managed on-premises infrastructure and began transitioning to cloud. Implemented monitoring with Prometheus and Grafana for client systems.

SKILLS

Kubernetes cluster administration; CI/CD pipeline design; Immutable infrastructure; Build automation; Service mesh implementation; Security hardening and compliance; Prometheus; Grafana; Datadog; Splunk

EDUCATION

Associate of Applied Science | Computer Information Systems | Tidewater Community College
2008-09 to 2011-06

PROJECTS

Container Platform Migration

Led migration of legacy applications to Kubernetes, achieving zero-downtime deployment and improving resource utilization by 30%. Technologies used: Docker, Terraform.

CERTIFICATIONS

AWS Certified DevOps Engineer – Professional

Issued by Amazon Web Services.

2018-01

CKA: Certified Kubernetes Administrator

Issued by Cloud Native Computing Foundation.

2019-01
