

# Candidate P044

Synthetic candidate profile

## EMPLOYMENT HISTORY

Big Data Engineer | National Logistics Alliance | 2022-08 to Present

Architecting and implementing scalable data pipelines for nationwide logistics optimization, leveraging Apache Spark and Delta Lake to enable real-time shipment tracking.

Senior Data Integration Engineer | Crossroads Nonprofit Network | 2017-03 to 2019-06

Spearheaded the integration of donor and volunteer data across multiple platforms, utilizing Apache Hudi to ensure near-real-time data consistency in a high-volume environment.

Data Engineer II | Inland Empire United Way | 2016-08 to 2017-03

Led the migration of legacy data warehouses to cloud-based solutions using Apache Hive and HDFS, improving query performance by 40%.

Data Engineer | CargoSync Solutions | 2015-03 to 2016-07

Developed ETL pipelines using Python and SQL to process logistics data, and introduced Apache Iceberg for improved data versioning and time travel.

Big Data Analyst | Omega Shipping Cooperative | 2014-02 to 2015-03

Analyzed shipping volumes and patterns using SQL and Hive, delivering actionable insights that reduced operational costs by 12%.

ETL Developer | Pacific Freight Systems | 2013-02 to 2014-02

Data Warehouse Developer | Golden State Transport | 2011-09 to 2013-01

Designed data models and ETL processes for a transportation company, using SQL and Hive to support freight analytics.

Database Administrator | Desert Express Shipping | 2010-06 to 2011-08

Managed operational databases and developed reporting solutions using SQL to track shipment performance.

Junior Data Analyst | Mojave Nonprofit Consortium | 2009-01 to 2010-05

Assisted in data collection and reporting, writing SQL queries for donor and program metrics.

Support Technician | High Desert Nonprofit Services | 2008-05 to 2008-12

Warehouse Associate | Long Haul Freight | 2007-02 to 2008-04

Handled inventory tasks and learned the logistics chain from the ground up.

## SKILLS

Apache Spark; Delta Lake; SQL; Apache Iceberg; HDFS; Apache Hudi; Apache Hive; dbt; Python; Data Integration

## EDUCATION

Data Management | Local Union Apprenticeship Program

2006-09 to 2008-06

## PROJECTS

Real-Time Logistics Data Pipeline

Designed and implemented a streaming pipeline using Apache Spark and Delta Lake, enabling real-time visibility into inventory levels across regional warehouses. Technologies used: SQL, Python.

### Data Lake Optimization for Nonprofit

Engineered a data lake on HDFS with Apache Hudi and Iceberg, improving data query performance and reducing storage costs while ensuring ACID compliance. Technologies used: Apache Hive, Apache Iceberg.

### CERTIFICATIONS

Cloudera Certified Professional (CCP) Data Engineer

Issued by Cloudera.

2018-01

Databricks Certified Associate Developer for Apache Spark

Issued by Databricks.

2023-01
