

Candidate P051

Synthetic candidate profile

EMPLOYMENT HISTORY

Streaming Data Engineer | DataStream Solutions – Des Moines Franchise | 2023-06 to 2024-07

Built and maintained Kafka pipelines for real-time analytics, implemented checkpointing and offset management, and tuned Spark Streaming jobs for performance.

Data Engineer Intern | Midwest Analytics Group | 2022-05 to 2022-08

Assisted in migrating batch ETL to streaming using Kafka and Spark Structured Streaming, focusing on fault tolerance and backpressure handling.

Streaming Data Engineer | DataStream Solutions – Des Moines Franchise | 2024-08 to Present

Returned to the franchise to lead streaming infrastructure improvements, implementing Debezium for CDC and optimizing lakehouse storage in Snowflake.

SKILLS

Apache Kafka; Apache Spark Streaming; Streaming ETL; Fault tolerance in streaming; Checkpointing and recovery; Offset management; Consumer group management; Avro serialization; Data lakes and lakehouses; Snowflake; Debezium; RisingWave; Materialize; Monitoring and alerting for streaming; Backpressure handling; Performance tuning for streaming workloads

EDUCATION

Bachelor of Science | Computer Science | Iowa State University

2019-09 to 2023-06

PROJECTS

Real-time Anomaly Detection Pipeline

Designed a streaming ML feature pipeline using Kafka and Spark Streaming to detect anomalies in IoT sensor data, with exactly-once semantics and checkpointing. Technologies used: Apache Kafka, Apache Spark Streaming, Avro, Snowflake.

CERTIFICATIONS

Confluent Certified Developer for Apache Kafka

Issued by Confluent.

2024-01
