

# Candidate P055

Synthetic candidate profile

## EMPLOYMENT HISTORY

Principal Machine Learning Engineer | Lockheed Martin Aeronautics | 2018-03 to Present

Leading design and deployment of predictive analytics for aircraft maintenance and manufacturing quality. Mentoring senior engineers while remaining an individual contributor.

Senior Machine Learning Engineer | Northrop Grumman | 2013-07 to 2018-02

Built and maintained forecasting models for supply chain and production line optimization. Introduced MLOps practices and model monitoring frameworks.

Machine Learning Engineer | Raytheon Technologies | 2010-05 to 2013-06

Developed anomaly detection and NLP models for defense intelligence applications. Worked on model selection and hyperparameter tuning in production.

Data Analyst | Los Angeles County Department of Public Works | 2004-09 to 2010-04

Analyzed civil infrastructure data, used R for statistical analysis and Power BI for reporting. Gained understanding of operational data and systems.

Operations Assistant | Kaiser Permanente | 2002-01 to 2004-08

Processed data entry and assisted with report generation. Early career detour before pursuing analytics.

## SKILLS

Time Series Analysis; Anomaly Detection; Model Selection; Hyperparameter Tuning; MLOps; Model Monitoring; A/B Testing; Recommender Systems; Natural Language Processing; scikit-learn; Keras; R; Git; Power BI; MongoDB; Python; SQL

## EDUCATION

Associate of Science | Mathematics | Antelope Valley Community College

2004-09 to 2006-06

Bachelor of Science | Computer Science | California State University, Long Beach

2006-09 to 2009-06

Master of Science | Data Science | University of Southern California

2009-09 to 2011-06

## PROJECTS

Predictive Maintenance Dashboard

Developed an end-to-end predictive maintenance system for aircraft components using time series analysis and anomaly detection. Integrated with Power BI for real-time monitoring. Technologies used: Keras, scikit-learn, MLOps.

Anomaly Detection in Manufacturing

Implemented anomaly detection models to identify defects in production lines, reducing downtime by 20%. Used A/B testing to validate model improvements. Technologies used: scikit-learn, Keras, MongoDB.

## CERTIFICATIONS

AWS Certified Machine Learning – Specialty

Issued by Amazon Web Services.

2019-01

TensorFlow Developer Certificate

Issued by Google.

2020-01
