

Candidate P063

Synthetic candidate profile

EMPLOYMENT HISTORY

Bartender | The Rusty Spur | 2019-04 to 2024-01

Orchestrated high-volume beverage service and managed inventory with a keen eye for operational efficiency. Leveraged strong interpersonal skills to foster a loyal clientele.

Machine Learning Intern (Contract) | Local Autonomous Systems Startup | 2024-02 to 2024-06

Assisted in building a sensor fusion model for a prototype autonomous vehicle. Implemented data augmentation pipelines and contributed to model evaluation, improving accuracy by 12%.

Bartender | The Rusty Spur | 2024-07 to Present

Continuing to provide exceptional service while actively seeking a full-time role as a Machine Learning Engineer. Applying data-driven mindset to optimize workflow and customer satisfaction.

SKILLS

Python; scikit-learn; TensorFlow; PyTorch; Deep Learning; Model Evaluation; Model Deployment; SQL; R; Hadoop; Data Visualization; Hyperparameter Tuning; NumPy; PostgreSQL; Kubeflow; Seaborn; dbt; Apache Kafka

EDUCATION

Associate of Science | Computer Science | Victor Valley College

2020-09 to 2023-06

Bachelor of Science | Computer Science | California State University, San Bernardino

2023-09 to 2025-06

PROJECTS

Predictive Maintenance for HVAC Systems

Developed a time-series model using LSTM to predict equipment failures, achieving an F1-score of 0.85. Deployed via TensorFlow Serving and containerized with Docker. Technologies used: Python, Kubeflow, NumPy.

Real-time Sentiment Analysis Pipeline

Built a streaming data pipeline with Apache Kafka and dbt to analyze customer feedback. Utilized Scikit-learn for sentiment classification and visualized results with Seaborn.

CERTIFICATIONS

TensorFlow Developer Certificate

Issued by TensorFlow.

2024-01
