

Candidate P071

Synthetic candidate profile

EMPLOYMENT HISTORY

Principal Machine Learning Engineer | Meridian Analytics | 2018-03 to Present

Lead computer vision and feature engineering for fraud detection models. Oversaw MLOps pipelines using Kubeflow and Airflow.

Senior Machine Learning Engineer | FinCore Systems | 2014-01 to 2018-02

Developed and deployed models for real-time transaction monitoring. Built streaming pipelines with Kafka and feature stores.

Machine Learning Engineer | DataVista Corp | 2012-06 to 2013-12

Worked on image recognition for document processing. Gained experience with Keras and XGBoost.

Data Scientist | QuantEdge Solutions | 2010-01 to 2012-05

Performed data analysis and built predictive models for trading strategies. This was a lateral move from software engineering.

Software Engineer | TechBridge Inc | 2007-01 to 2009-12

Built backend systems and data pipelines. Early career role.

SKILLS

Computer Vision; Keras; XGBoost; SQL; Big Data Technologies; Feature Engineering; Airflow; Kubeflow; Apache Kafka; AWS; TensorFlow; Python; PyTorch; Docker; Kubernetes

EDUCATION

Master of Science | Computer Science | Stanford University

2008-09 to 2010-06

Bachelor of Science | computer engineering | University of California, Los Angeles

2002-09 to 2006-06

PROJECTS

Real-time Fraud Detection Pipeline

Architected a streaming fraud detection system using Kafka and AWS Kinesis, processing millions of transactions daily with low latency. Technologies used: Apache Kafka, Apache Flink, Python.

Computer Vision for Document Verification

Led development of a deep learning model using Keras to verify identity documents, reducing manual review time by 70%. Technologies used: TensorFlow, OpenCV, AWS SageMaker.

CERTIFICATIONS

AWS Certified Machine Learning – Specialty

Issued by Amazon Web Services.

2020-01

TensorFlow Developer Certificate

Issued by TensorFlow.

2019-01
