

Candidate P081

Synthetic candidate profile

EMPLOYMENT HISTORY

Satellite Systems Operator | United States Space Force | 2013-06 to 2023-08

Operated and maintained satellite communication systems, ensuring secure and reliable data transmission. Led a team of technicians in monitoring system health and troubleshooting anomalies, honing my ability to work under pressure and in shifts.

Frontend Developer (Contract) | Nexus Staffing Solutions | 2023-09 to Present

Developing responsive React components for a government client, focusing on accessibility and performance. Collaborating with a distributed team to integrate REST APIs and optimize PWA features.

SKILLS

TypeScript; JavaScript (ES6+); React; Component Architecture; Progressive Web Apps (PWA); Jest; Performance Optimization; REST API Integration; MongoDB; Redux DevTools; Netlify; CSS3; HTML5

EDUCATION

Front End Development | freeCodeCamp

2021-09 to 2022-06

PROJECTS

Mission Dashboard PWA

Built a progressive web app to visualize satellite telemetry data, using React and TypeScript. Implemented offline support and performance optimizations. Technologies used: PWA, MongoDB.

CERTIFICATIONS

freeCodeCamp Front End Development Libraries Certification

Issued by freeCodeCamp.
