

Candidate P093

Synthetic candidate profile

EMPLOYMENT HISTORY

Intelligence Analyst | Air National Guard | 2018-06 to Present

Apply data analysis and pattern recognition to support mission planning. Leverage Python and big data tools to process and interpret intelligence data. Maintain Secret clearance and ensure data accuracy and security.

Junior Machine Learning Engineer | Aero Data Systems | 2022-08 to Present

Develop and deploy ML models for autonomous vehicle navigation. Implemented time series models and recommender systems using PyTorch and scikit-learn. Worked with Docker and Kubernetes for model deployment.

Data Analyst Intern | Aero Data Systems | 2021-06 to 2021-12

Assisted senior analysts with data cleaning, exploratory analysis, and visualization. Used Python, R, and Power BI to support project reports. Gained exposure to cross-validation and model evaluation techniques.

Intelligence Specialist | Air National Guard | 2018-06 to 2021-05

Processed and analyzed intelligence data to support operations. Utilized big data technologies and statistical tools to identify trends. Developed strong attention to detail and data accuracy.

SKILLS

Python; PyTorch; scikit-learn; Cross-validation; Model Evaluation; Recommender Systems; Time Series Analysis; Big Data Technologies; R; LightGBM; Docker; Kubernetes; Power BI; Seaborn; NumPy; Git

EDUCATION

Associate of Science | Computer Science | Bakersfield Community College

2016-09 to 2018-06

Bachelor of Science | Computer Science | California State University, Bakersfield

2019-09 to 2021-06

PROJECTS

Predictive Maintenance for UAV Sensors

Developed a time series model using LSTM networks to predict sensor failures in drones, improving maintenance scheduling by 20%. Technologies used: Python, PyTorch, pandas, NumPy, Docker.

Recommendation System for Intelligence Reports

Built a recommender system to suggest relevant intelligence reports to analysts using collaborative filtering. Implemented with scikit-learn and evaluated using precision@k. Technologies used: Python, LightGBM, Git, Seaborn.

CERTIFICATIONS

AWS Certified Machine Learning – Specialty

Issued by Amazon Web Services.

2023-01

TensorFlow Developer Certificate

Issued by Google.

2022-01
