

Candidate P102

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Frontend Engineer | Solano County IT Services | 2021-03 to Present

Led frontend architecture for county public-facing applications, improving Core Web Vitals scores and implementing comprehensive testing strategies. Mentored a team of four developers and drove adoption of Tailwind CSS and modern state management.

Frontend Engineer | Bay Area Rapid Transit (BART) | 2018-06 to 2021-02

Developed and maintained rider-facing web applications, focusing on accessibility and cross-browser compatibility. Implemented real-time data visualizations and automated testing pipelines.

Web Developer | Vallejo Lumber & Hardware | 2016-05 to 2018-05

Built and maintained the company's e-commerce and inventory systems, integrating third-party APIs and improving page load times. Also handled internal tooling for staff.

Junior Frontend Developer | Vallejo Lumber & Hardware | 2015-02 to 2016-04

Assisted in website updates, created responsive layouts, and fixed cross-browser issues. Collaborated with the marketing team to implement UI changes.

SKILLS

Redux; Cross-Browser Compatibility; Core Web Vitals; Tailwind CSS; Testing (Jest, React Testing Library, Cypress); Angular; JavaScript (ES6+); Node.js; GraphQL; CSS-in-JS; REST APIs
