

Candidate P112

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Payments Engineer | Precision Manufacturing Solutions | 2019-06 to Present

Lead architect of payment systems for B2B invoicing and ACH transfers. Spearheaded integration of Stripe and Adyen, cutting transaction failures by 40%. Implemented real-time monitoring and alerting for settlement anomalies.

Payments Engineer | Precision Manufacturing Solutions | 2016-03 to 2019-05

Owned design and maintenance of internal payment processing for supplier invoices. Deployed tokenization for card-on-file transactions and upgraded database schemas for transaction logging.

Software Engineer | Precision Manufacturing Solutions | 2014-02 to 2016-02

Developed internal tools for inventory and order management. Gained exposure to ERP systems and began focusing on payment flows.

Junior Software Developer | Precision Manufacturing Solutions | 2012-01 to 2014-01

Built reporting dashboards and maintained legacy .NET applications. Collaborated with finance team to automate invoice generation.
