

Candidate P115

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Machine Learning Engineer | Sentinel AI Solutions | 2021-06 to Present

Lead development of autonomous systems, improving model accuracy by 23% via advanced hyperparameter tuning and cross-validation. Deployed computer vision and NLP models to production, reducing inference time by 40%.

Machine Learning Engineer | DataForge Analytics | 2018-03 to 2021-05

Built recommender systems and data preprocessing pipelines using Spark, handling 1.2B events daily. Increased model AUC by 15% through feature engineering and model evaluation.

Lead Data Scientist | Quantitative Systems Inc. | 2014-01 to 2017-12

Managed a team of 5 data scientists, delivering predictive models for logistics optimization. Reduced maintenance costs by 18% through data-driven decision models.

Data Analyst | US Air Force | 2012-01 to 2013-12

Analyzed mission data to improve resource allocation, cutting operational costs by 12% through statistical analysis and reporting.

Data Scientist | Quantitative Systems Inc. | 2010-03 to 2011-12

Developed early machine learning models for anomaly detection in sensor data. Improved detection rates by 28% using computer vision techniques.

Intelligence Analyst | US Air Force | 2006-01 to 2009-12

Processed and analyzed intelligence data, translating raw data into actionable insights. Utilized data preprocessing to support mission planning.

SKILLS

Spark; Recommender Systems; Computer Vision; Model Evaluation; Keras; Cross-validation; Natural Language Processing; Data Preprocessing; Hyperparameter Tuning; Model Deployment; Airflow; Git; NumPy; Seaborn; Python; Pandas; SQL; Docker

EDUCATION

Associate of Science | Computer Science | Augusta Technical College

2008-09 to 2010-06

Bachelor of Science | Computer Science | Georgia State University

2010-09 to 2013-06

PROJECTS

Autonomous Drone Navigation

Developed a computer vision system for autonomous drone navigation, achieving 96% obstacle avoidance accuracy using Keras and deployed via Docker.

Real-time Recommendation Engine

Built a real-time recommendation engine using Spark and Airflow, improving click-through rate by 25% through collaborative filtering. Technologies used: Recommender Systems.

CERTIFICATIONS

TensorFlow Developer Certificate

Issued by Google.

2022-01

AWS Certified Machine Learning – Specialty

Issued by Amazon Web Services.

2021-01
