

Candidate P121

Synthetic candidate profile

EMPLOYMENT HISTORY

Software Development Intern | University of Nebraska–Lincoln | 2023-05 to 2023-08

Built and maintained CI/CD pipelines in Jenkins for internal web apps. Implemented performance optimizations reducing page load by 30%. Used Git for version control and collaborated on microservices architecture.

Undergraduate Research Assistant | Private Liberal Arts College | 2023-09 to 2024-05

Assisted in research on distributed systems, focusing on containerization with Kubernetes. Designed RESTful APIs and optimized SQL queries for data retrieval. Participated in code reviews using GitLab.

SKILLS

CI/CD pipelines; performance optimization; version control (Git); API development; web development fundamentals; microservices architecture; design patterns; dependency management; containerization; data structures; SQL queries; Jenkins; Kubernetes; MongoDB; GitLab; CircleCI; GitHub; IntelliJ IDEA

EDUCATION

Bachelor of Science | Computer Science | A Private Liberal Arts College

2021-09 to 2025-06

PROJECTS

E-Commerce Platform

Developed a full-stack e-commerce web app using microservices architecture. Containerized services with Docker and orchestrated with Kubernetes. Automated deployments with CircleCI. Technologies used: Node.js, React, MongoDB.
