

Candidate P132

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Software Engineer | AutoTech Solutions | 2022-01 to Present

Leading cloud migration and data pipeline optimization for connected vehicle telematics. Spearheading performance enhancements and mentoring junior engineers.

Software Engineer (Contract) | DataDriven Auto Analytics | 2020-06 to 2021-12

Designed and implemented ETL solutions for automotive sales data. Improved query performance and maintained technical documentation.

Backend Developer (Freelance) | Independent Contractor | 2018-03 to 2020-05

Delivered full-stack solutions for local automotive businesses. Focused on backend development, integrating cloud services, and ensuring code quality.

Junior Software Developer (Contract) | Midwest Motor Data Services | 2016-02 to 2018-02

Built and maintained internal tools for vehicle inventory management. Performed unit testing and participated in code reviews.

IT Support Technician | AutoCare Network | 2014-01 to 2016-01

Provided technical support and maintained internal systems. Gained foundational knowledge of networking and database management.

SKILLS

debugging; technical documentation; SQL queries; algorithms; cloud services; performance optimization; unit testing; code review; Docker; Azure; Git; GitLab; GitHub

EDUCATION

Certificate | Computer Programming | Metropolitan Community College

2013-09 to 2014-06

PROJECTS

Real-time Vehicle Telemetry Dashboard

Developed a cloud-based dashboard for real-time monitoring of vehicle diagnostics, leveraging Azure services and Docker for scalable deployment. Technologies used: SQL, GitHub.

ETL Pipeline for Automotive Sales Data

Built an automated ETL pipeline to ingest and transform sales data from multiple sources, reducing processing time by 40%. Technologies used: Azure, SQL, Python, GitLab.

CERTIFICATIONS

Microsoft Certified: Azure Developer Associate

Issued by Microsoft.

2022-01
