

Candidate P162

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Python Developer | Veridian Research Institute | 2021-04 to Present

Leading migration of legacy data pipeline to modern Python with type hints and concurrency. Mentoring juniors on best practices and refactoring strategies.

Python Developer | Halcyon Analytics | 2019-11 to 2021-03

worked on client site to optimize PostgreSQL queries and implement multithreading for their reporting service. Also did some Docker containerization and Travis CI setup.

DevOps Engineer | Bluepeak Systems | 2018-07 to 2019-10

Maintained CI/CD pipelines using Travis CI and Docker. Focused on increasing deployment reliability and reducing downtime.

Backend Python Developer | Altitude Technologies | 2017-01 to 2018-06

Developed REST APIs and worked on database optimization with MySQL and PostgreSQL. Introduced type hints to improve code maintainability.

Python Developer | Northstar Data Labs | 2015-08 to 2016-12

Built data processing scripts using Jupyter Notebooks for exploratory analysis. worked on refactoring legacy code and improving performance.

Junior Python Developer | Cobalt Software | 2014-02 to 2015-07

Started as junior dev, focused on writing unit tests and maintaining virtual environments. Learned a lot about MySQL and PostgreSQL backends.

Travelling Technician | Metro Utilities | 2011-06 to 2013-12

Worked in the field installing and maintaining electrical systems. This was during my apprenticeship and taught me practical problem solving.

SKILLS

Virtual environments; PostgreSQL; Refactoring; Type hints; Multithreading; Concurrency; MySQL; Docker; Travis CI; Jupyter Notebook; AWS; Kubernetes

EDUCATION

Electrical Systems | Union Apprenticeship Program

2011-09 to 2014-06

PROJECTS

Concurrent Data Pipeline

Designed and implemented a multithreaded data ingestion pipeline using Python's concurrency features. Improved throughput by 300%. Technologies used: Multithreading, PostgreSQL.

Refactoring Legacy Monolith

Led a project to refactor a monolithic Python application into modular components with type hints, reducing tech debt significantly. Technologies used: Refactoring.

CERTIFICATIONS

PCPP – Certified Professional in Python Programming

Issued by Python Institute.

2019-01

AWS Certified Developer – Associate

Issued by Amazon Web Services.

2020-01
