

Candidate P184

Synthetic candidate profile

EMPLOYMENT HISTORY

Senior Data Engineer | Nonprofit Health Alliance | 2022-03 to Present

Design and implement real-time machine learning data pipelines. Using GCP Dataflow and dbt. Optimize query performance on Redshift.

Lead Data Engineer | Insurance Solutions Group | 2020-08 to 2022-01

Led design of streaming data pipelines for claims analytics. Implemented Scala-based processing and schema evolution strategies.

Data Engineer | HealthFirst Nonprofit | 2019-02 to 2020-05

Developed ETL pipelines for donation data. Focused on data cleansing and validation.

Data Engineer | Texas Mutual Insurance | 2017-09 to 2018-12

Built data pipelines for policy and claims data. Optimized SQL queries for reporting.

Data Analyst | Community Health Systems | 2016-03 to 2017-06

Analyzed patient data, supported reporting. Began learning data engineering on the job.

IT Support Specialist | Amerigroup | 2014-11 to 2016-02

Supported internal systems, gained exposure to data systems.

Junior Data Analyst | State Farm | 2013-05 to 2014-09

Assisted with data entry and reporting.

Various roles | Several companies | 2008-01 to 2013-03

Worked in customer service and administrative roles, learned programming on the side.

SKILLS

Metadata management; API integration; Data partitioning; Data validation; Data modeling; Performance tuning; Workflow scheduling; Data cleansing; Streaming data processing; Real-time data processing; SQL optimization; Schema design; Google Cloud Dataflow; dbt; Redshift; Python; Apache Kafka; Apache Spark; Docker

EDUCATION

Associate of Applied Science | Computer Science | Austin Community College

2009-09 to 2012-06

PROJECTS

Real-time Claims Monitoring Pipeline

Built streaming pipeline to detect fraudulent claims in real-time using Dataflow and Kafka. Reduced detection time by 70%. Technologies used: Google Cloud Dataflow, Apache Kafka, Scala, Redshift.

Data Lake Migration

Migrated on-prem data warehouse to cloud-based lakehouse using dbt and Redshift. Implemented partitioning and schema design. Technologies used: Google Cloud Storage, Airflow.

CERTIFICATIONS

Google Professional Data Engineer

Issued by Google.

2021-01

Databricks Certified Data Engineer Associate

Issued by Databricks.

2020-01
