

Candidate P185

Synthetic candidate profile

EMPLOYMENT HISTORY

Integration Engineering Intern | NexaScale | 2024-06 to 2024-12

Built and tested API integrations for client onboarding. Used Redis and Temporal to handle async workflows, and Debezium for change data capture.

Backend Developer Intern | NexaScale | 2023-06 to 2023-08

Developed REST endpoints for internal tools and wrote SQL queries to optimize report generation. Implemented rate limiting on a public API.

SKILLS

API gateway; Data serialization; Authentication and authorization; Rate limiting; SQL optimization; Message queues; Integration testing; Redis; Kubernetes; Debezium; Temporal; MongoDB; Python; Java; RESTful APIs; Docker; Git

EDUCATION

Bachelor of Science | Computer Science | California State University San Marcos

2022-09 to 2025-06

PROJECTS

Event-Driven Microservices Dashboard

Built a dashboard to monitor Kafka messages and service health, using Debezium for CDC and Kubernetes for deployment. Technologies used: React.

REST API Rate Limiter

Implemented a middleware for rate limiting using Redis and token bucket algorithm. Technologies used: Node.js, Express.

CERTIFICATIONS

AWS Certified Solutions Architect

Issued by Amazon Web Services.

2024-01
