

Candidate P192

Synthetic candidate profile

EMPLOYMENT HISTORY

Cyber Systems Operator | Army National Guard | 2017-06 to Present

Managed and secured tactical communication systems, ensuring data integrity and availability. Coordinated with joint forces on network operations, applying agile methodologies to mission planning and execution.

IT Support Specialist | Ohio State University | 2021-01 to 2022-08

Provided technical support for faculty and students, troubleshooting hardware and software issues. Implemented minor database queries for asset tracking and contributed to internal documentation.

Freelance Web Developer | Self-employed | 2023-03 to Present

Developed and maintained small business websites, focusing on responsive design and performance optimization. Utilized RESTful API design and unit testing to ensure reliable delivery.

SKILLS

agile development; unit testing; performance optimization; API design; database design; Docker; version control; Kubernetes; Jenkins; VS Code

EDUCATION

Bachelor of Science | Computer Science | Denison University

2019-09 to 2024-06

PROJECTS

Secure Chat Application

Built a real-time chat application with end-to-end encryption using WebSockets and PostgreSQL. Focused on API design and unit testing to ensure security and reliability. Technologies used: JavaScript, Node.js, Jest.

Inventory Management System

Created a web-based inventory system for a campus department, featuring role-based access control and reporting. Leveraged Docker for deployment and Jenkins for CI/CD. Technologies used: React, Python, MySQL.

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued by Amazon Web Services.

2023-01
