

Candidate P193

Synthetic candidate profile

EMPLOYMENT HISTORY

Lead Fintech Engineer | Northstar Trading Systems | 2018-03 to Present

Leading development of investment management systems for a venture-backed scaleup. Focus on secure data handling and integration of market data feeds. Managing a team of 6 engineers.

Senior Software Engineer | Highbridge Capital | 2013-01 to 2018-02

Built and maintained risk management and settlement systems. Implemented Kafka for real-time data streaming. Some blockchain prototyping.

Software Engineer | Highbridge Capital | 2008-06 to 2012-12

Developed software for securities settlement and payment gateway integration. Gained expertise in AML and encryption.

Software Developer | Genesee Regional Bank | 2003-02 to 2008-05

Worked on core banking systems. Introduced Python scripts for data analysis. Started using Go for microservices.

Junior Developer | Pinnacle Solutions | 2001-07 to 2003-01

First job out of school. Did web development and database work. Learned a lot.

SKILLS

securities settlement; data encryption; blockchain consensus mechanisms; distributed ledger technology; Anti-Money Laundering (AML); payment gateway integration; market data feeds; risk management systems; Go; Kafka; Python; Solidity; Kubernetes; AWS; SQL; React

EDUCATION

Associate of Science | Computer Science | Monroe Community College

1997-09 to 1999-06

Bachelor of Science | Computer Science | SUNY Buffalo State

1999-09 to 2001-06

PROJECTS

Blockchain Settlement Prototype

Developed a proof-of-concept for using blockchain to reduce settlement times. Implemented Solidity smart contracts and integrated with Kafka. Technologies used: Go.

AML Monitoring System

Built a real-time transaction monitoring system using Python and Kafka. Improved detection rates by 20%. Technologies used: AML.

CERTIFICATIONS

Certified Information Systems Security Professional (CISSP)

Issued by ISC2.

2016-01

Certified Financial Risk Manager (FRM)

Issued by GARP.

2019-01
